

## Heavy Duty Duroplast Bridge Handle M6 x 140

### DBHM6140

The thermoset material has the benefit of being more resistant to high temperatures than thermoplastic. Accordingly, this handle is frequently specified on catering equipment where its substantial proportions, robust construction and heat resistance make it an ideal choice.

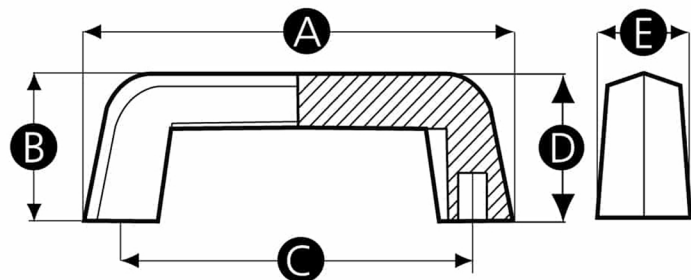

The smooth, gloss finish of duroplast is also a benefit when it comes to cleaning and avoiding contaminants collecting on the handle's surface

### Technical Specifications

 Colour	Black
<b>B</b>  Height (mm)	46
<b>A</b>  Length (mm)	140
 Product Type	simple
 Thread Size (D1)	M6
<b>D</b>  Thread Length (L) (mm)	28
<b>E</b>  Handle Width (mm)	30
<b>C</b>  Distance Between Fixing Centres (mm)	113
